Jan

Front End Software Developer
for Cineplex Entertainment
(Permanent Full-time)

Intermediate developer on the Front End modernization project - implementing the transition from a .NET MVC front end to Jamstack (Next.js and React)

Delivered AODA / WCAG compliant pages inside Cineplex.com, CineplexStore.com, and TheRecRoom.com
Built web components using vanilla JavaScript, React, and Vue, including consuming REST APIs to bind data to component Views

Transformed inline layouts into modularized templates, decoupling data from view using Agility CMS (headless)
